

SORBS Net Manager Access Application and Agreement

(Please complete and fax back to ATTN: SORBS Net Manager Program at (408)716-2927)

By applying for access to the SORBS Net Manager tool, you have agreed that you will only use the Net Manager tool for the purposes and in the manner set forth in the <http://www.us.sorbs.net/managers/managers-userguide.pdf>.

NET MANAGER DESCRIPTION:

The SORBS Net Manager tool allows authorized administrators to manage their netblocks when listed in the SORBS DNSBL. Using the Net Manager tool, an administrator can delist IPs in their net block, obtain additional information on the cause of listing as well as create additional administrators and delegate administration of sub-netblocks to these users. All applicants must prove their authorization as an administrator of their netblocks by reference to the publicly accessible records of a regional internet registry (RIR). All applicants are also responsible for providing prompt and timely update in any change to that authorization.
